**Press 3Seconds One Time**

**Press 3seconds One More Time on this menu**

**4pin Resistive Touch Calibration Mode**

# Auto Play Installation Guide (2018 Toyota Tacoma shown)

Step 1 Remove trim bezel from vehicle  
(NOTE) Make sure to protect surrounding areas to avoid scratching or damage

Step 2 Remove radio from dash after removing fastening bolts  
Step 3 Disconnect all connecting cables at the back of unit.  
Step 4 Proceed to remove the stereo. Place it in a safe area free from potential damage or scratching  
(NOTE) make sure bolts are placed in secure location so as not to lose

Step 5 Open Auto Play kit and proceed to unwrap Master T Harness  
Step 6 Proceed to connect the Master Harness to each respective connection. You will be connecting the 24 pin, 28 pin and 10 pin main harness  
Each of the provided T harnesses has a proprietary connection on it. Please make sure to connect accordingly

Connector 1 Connector 2 Connector 3

Step 7 Locate the Auto Play module, Video Interface, HDMI cable & audio cable  
Connect as follows:

MAIN RADIO HARNESS-Provides power to AP module and Video interface  
28 pin HARNESS- provides Touch and audio connections  
24 pin HARNESS-provides video interfacing into radio

Tech Support: (442) 400-9489

**Once all connections are complete, proceed to connect T harness plugs back into OEM stereo**

## Customer Service

## Returns

### 30-Day Money-Back Guarantee

At Emerald Integrations, we want to make sure that you are completely satisfied. If for some reason you aren't happy with an item on your order and want to return it, we make returns and refunds extremely simple.

Any complete, like-new item returned within 30-days can be returned for a full refund less the original cost of shipping. All items or packages shipped free of charge will be subject to a \$15.00 shipping fee. If returned items are not in like-new condition, then Emerald Integrations may refuse a return or charge a restocking fee of 10% - 20%. Items not in like-new condition include, but are not limited to: items missing original item packaging, opened software or media items, used items, installed items, abused or physically damaged items, items missing parts, items damaged due to improper return shipping, items with a different serial number or defaced serial number, pre-cut wire, made-to-order items and special order items. All returns must be shipped back in a shipping carton, items cannot be shipped back in product boxes. Should you have any questions about our return procedure, please don't hesitate to contact us.

### Return Disclaimer

Any unauthorized, improperly packaged, or non-insured packages will be returned to sender. Items that show signs of wear or have been, scratched, altered, or damaged in any way cannot be accepted for return

## Warranty

Emerald Integrations understands that there are minor chances that electronics can fail and defects happen, in the event that this occurs, Emerald Integrations is here to help you quickly resolve your defect for a full year of 1-Year Warranty Coverage. Unlike others who push you to a manufacturer service center that can be slow and unresponsive, we're here to help with the repair or replacement you need. To begin the process, follow the instructions on the returns page at [www.emeraldintegrations.com/returns](http://www.emeraldintegrations.com/returns).

The terms of the warranty are subject to the specific manufacturer and all expressed and implied warranties are provided solely by the manufacturer. Every item approved for a warranty claim is inspected by our team of qualified experts and professionally tested.

Emerald Integrations is a retail and wholesale distributor of vehicle electronic components, specializing in car safety. Emerald tests each product individually to ensure optimal performance and is NOT responsible for any negligence or damages caused by the installation process. Should a customer request assistance in finding an installer, Emerald holds no liability for any installers recommended by Emerald, it's employees or affiliates.
